

on the Board of Directors and on both the Legislative and Financial Committees of the Board. He also enthusiastically participated for many years on the Committee on State Legislation and Regulations, as well as the MDPAC Board, the Committee on Federal Legislation, as well as other committees and task forces.

Doctor Elmassian's philosophy of engagement puts patients before politics. He believes that organizational relationships, ongoing interaction with state and federal policymakers, and coalition building are integral to developing sound health policy. It is Doctor Elmassian's philosophy that together we will achieve better outcomes for patients and providers.

As a licensed commercial pilot, Doctor Elmassian enjoys vacationing in Glen Arbor in the summer, reading biographies, the opera, mountain treks in New Hampshire, and exercising, all of which he enjoys most with his family, which includes his wife, Georgina and their sons, Joshua and Zachary.

I ask that the House of Representatives join me in thanking Doctor Elmassian for his exemplary service to his community and congratulating him on his installation as President of the Michigan State Medical Society.

A TRIBUTE TO ANNE MURR

HON. TOM LATHAM

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 25, 2013

Mr. LATHAM. Mr. Speaker, I rise today to congratulate and recognize Anne Murr for being named a 2013 Hero of the Heartland by the American Red Cross serving Greater Iowa.

Each year, the American Red Cross serving Greater Iowa recognizes Heroes of the Heartland by selecting everyday Iowans who have done extraordinary things to help their neighbors and communities. The Iowans honored with this prestigious award displayed selflessness in a variety of courageous, charitable and thoughtful acts. The Heroes of the Heartland program not only showcases the heroes among us, but also helps raise crucial funds to ensure that the American Red Cross is prepared and equipped to assist those that need food, shelter, and comfort during emergencies and difficult times.

Anne Murr was named a Hero of the Heartland through her efforts as Drake University's Coordinator of the Adult Literacy Center. For more than 20 years, Anne has continued to do everything she can to change lives at the center, from playing support roles to educating and coordinating activities. Outside of her office hours, Anne also plans community-wide events to connect students, tutors and community members. Anne's work as a teacher and a leader has enriched lives and the world around her. She is truly an example our state can be proud of.

Mr. Speaker, Ms. Murr's actions that earned her the title a "Hero of the Heartland" are a testament to the humble, hardworking and helpful people who make up the great state of Iowa. I invite my colleagues in the House to join me in congratulating Anne on a job well done, thanking the American Red Cross serving Greater Iowa for their life changing efforts, and wishing all of those involved in the Heroes

of the Heartland program continued success for years to come.

SALUTE TO COAST GUARD STATION, PORT CANAVERAL FOR SERVICE IN SUPPORT OF AMERICA'S SPACE SHUTTLE PROGRAM

HON. BILL POSEY

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 25, 2013

Mr. POSEY. Mr. Speaker, I rise today to congratulate the brave men and women of the Coast Guard Station, Port Canaveral on their reunion which is set to take place on May 4, 2013. I rise to commend the meritorious service and commitment of Coast Guard Station Port Canaveral Active Duty, Reserve, and Auxiliary personnel who supported National Aeronautics and Space Administration (NASA) Space Shuttle missions. Their service was critical to the safety of the public and the Shuttle missions. A special thanks, also, to retired Admiral G. Robert Merrilees, who has kept a watchful eye on the Space Coast and played a significant role in this celebration of service.

On April 12, 1981, the Coast Guard Station, Port Canaveral began their service in support of NASA's Space Transportation Program (STS) program and provided that support for 135 manned space flight missions. Responsible for over 550 square miles surrounding the Kennedy Space Center, the Port Canaveral station managed STS recovery and safety missions for 30 years. These resolute men and women successfully carried out their mission to ensure the safety not only of the Shuttle, but also for over 200,000 viewers per Shuttle mission.

This dedication and mission accountability would not be possible without the contributions and calculated efforts of over 100 personnel that supported each launch.

Coast Guard Station Port Canaveral personnel played a substantial role as first responders to the Space Shuttle *Challenger* tragedy on January 28, 1986. Contributing 1,300 hours surveying 150,000 square miles of ocean surface throughout an 11 day mission and recovery operation, Station Port Canaveral deserves recognition for its stamina, professionalism, and commitment to mission execution. Their service was exemplary throughout their 30-year space shuttle support mission.

I offer my sincere gratitude and thanks to Coast Guard Station Port Canaveral and the men and women who served active duty, reserve and auxiliary roles in support of our Space Shuttle program between April 12, 1981 and February 24, 2011. May the Space Coast and our nation always remember the service of these brave men and women.

THE DAIRY FREEDOM ACT

HON. BOB GOODLATTE

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 25, 2013

Mr. GOODLATTE. Mr. Speaker, I rise today to introduce the Dairy Freedom Act with my colleague, the gentleman from Georgia, DAVID SCOTT.

This legislation will ensure that the American public will not run into another "DAIRY CLIFF." Last Congress, we did not get to vote on a Farm Bill because, among other things, there was a major problem with the dairy policy section.

Every member that represents a Congressional District with dairy farmers is acutely aware of how our current programs failed dairy farmers and the hardship these families experienced. There is no single farm district member who disagrees on the need for fundamental reform of our dairy program. We all agree on the need to reform and improve our current dairy policies—and our bill would do just that. However, our bill would strike the proposed "dairy market stabilization program." This highly controversial piece would attempt to manage the U.S. milk supply, and in the process penalize both consumers of dairy products, and dairy farmers who expand their operations. This program was proposed to be included in the extension of the 2008 Farm Bill—but it was resoundingly rejected by the House and Senate leadership. Do we really want to run into this wall again? I don't think so if we want to get a Farm Bill done this year.

I would ask Chairman LUCAS and Ranking Member PETERSON to include the Dairy Freedom Act, what we consider to be the compromise, in the Chairman's Mark of the Farm Bill. Our bill is largely based on the Dairy Security Act offered last Congress by Ranking Member COLLIN PETERSON (D-MN) and is anticipated to be included again in the underlying Farm Bill. The only fundamental difference is that it would exclude the supply management program, and require more fiscally responsible risk management insurance premium levels for large farmers.

Supply management runs contrary to the goals of limited government and economic growth. A supply control program that will directly intervene in markets and increase milk prices will ultimately hurt producers as well as dairy food manufacturers by stifling industry growth. A national dairy policy that allows the market to determine prices paid—with the addition of a new risk management tool such as Margin Protection Insurance—will help dairy producers withstand unforeseen market conditions. This is no different than how other commodities are treated in the Farm Bill.

Our bill also represents a true compromise on dairy policy. We agree that our dairy programs need to be reformed and we have accepted over 80% of the proposals that have been made by Ranking Member COLLIN PETERSON. We agree a strong safety net is needed for dairy farmers. What we reject is the idea that government also needs to intervene in dairy markets by controlling milk production, and ultimately milk prices.

Many have labeled the disagreement about supply management as a fight between dairy producers and dairy processors. The truth, however, is that because supply management programs are designed to have government artificially manipulate prices, they are opposed by a wide variety of groups. Consumer advocates point out that increased dairy prices mean families will be forced to stretch their food budgets further, and perhaps purchase less nutritious products than dairy. Food manufacturers, retailers and restaurants know that increased dairy prices will hurt their businesses as well. And, finally, all of our major,
